L

網頁寬度

1280 px

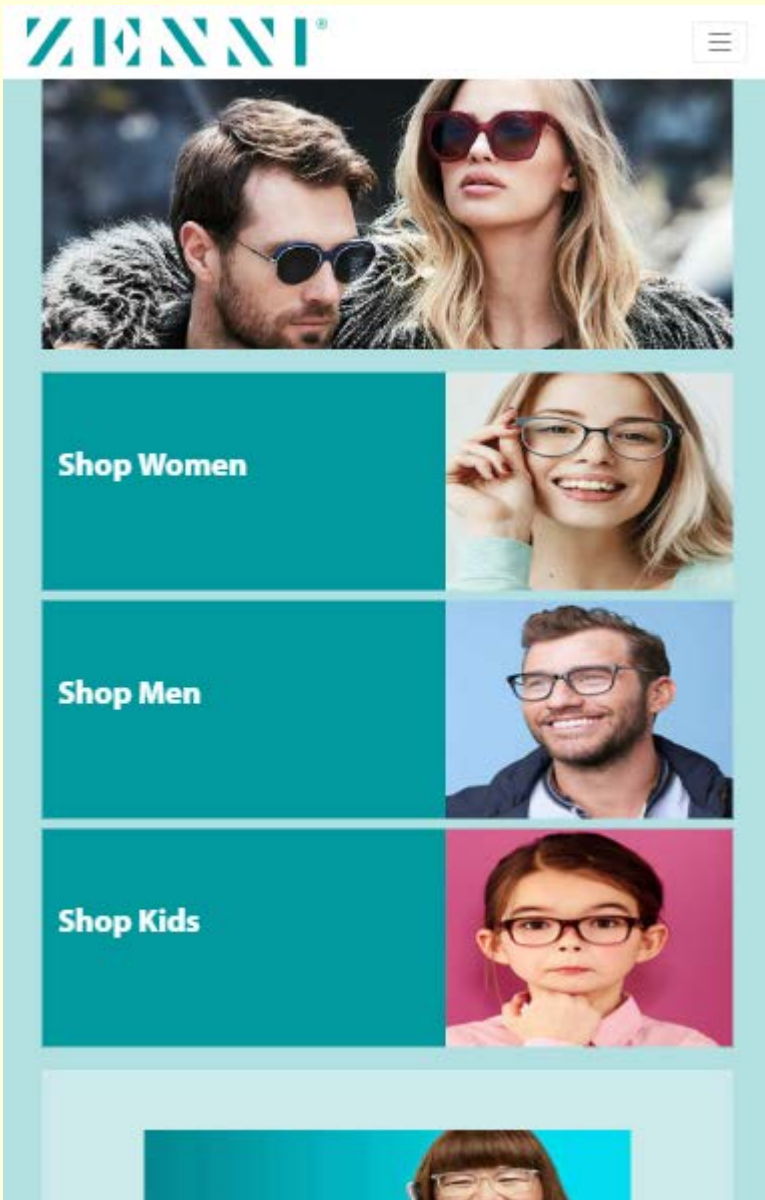

1 L「網頁寬度：1280 px」

The description of this design has been demonstrated in the previous homework.

M

網頁寬度

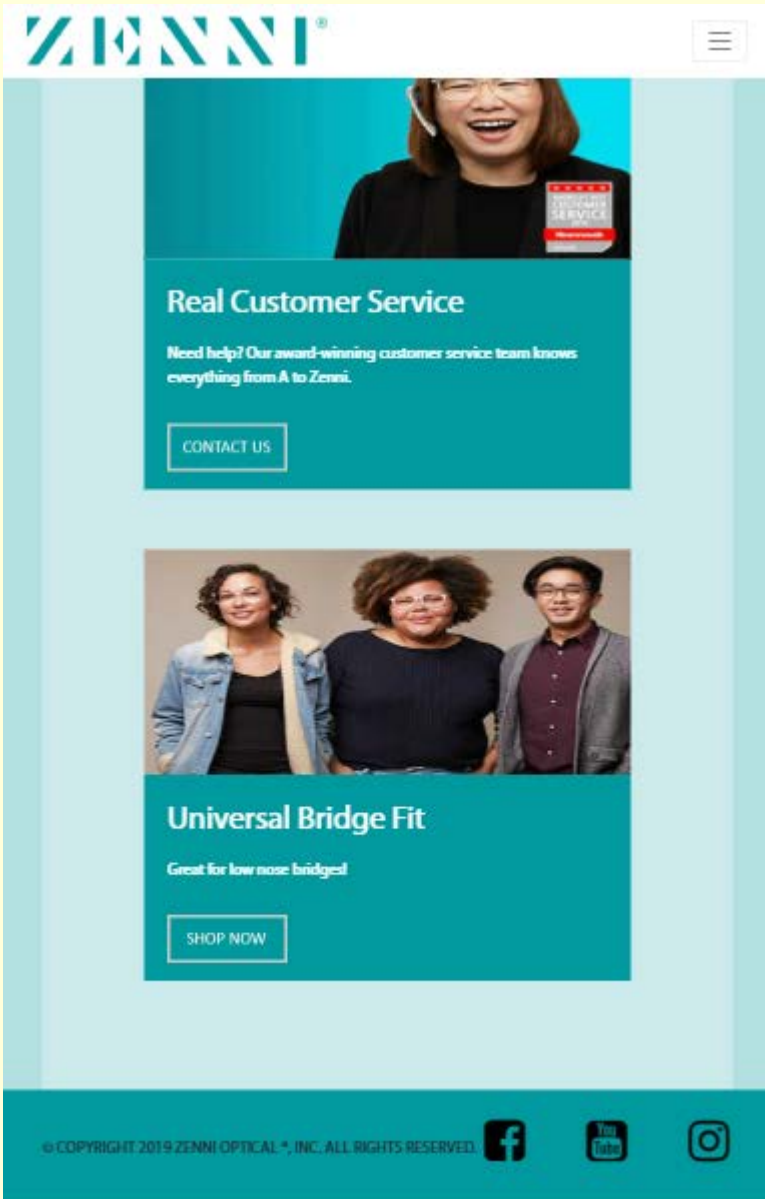

768 px

② M「網頁寬度：768 px」

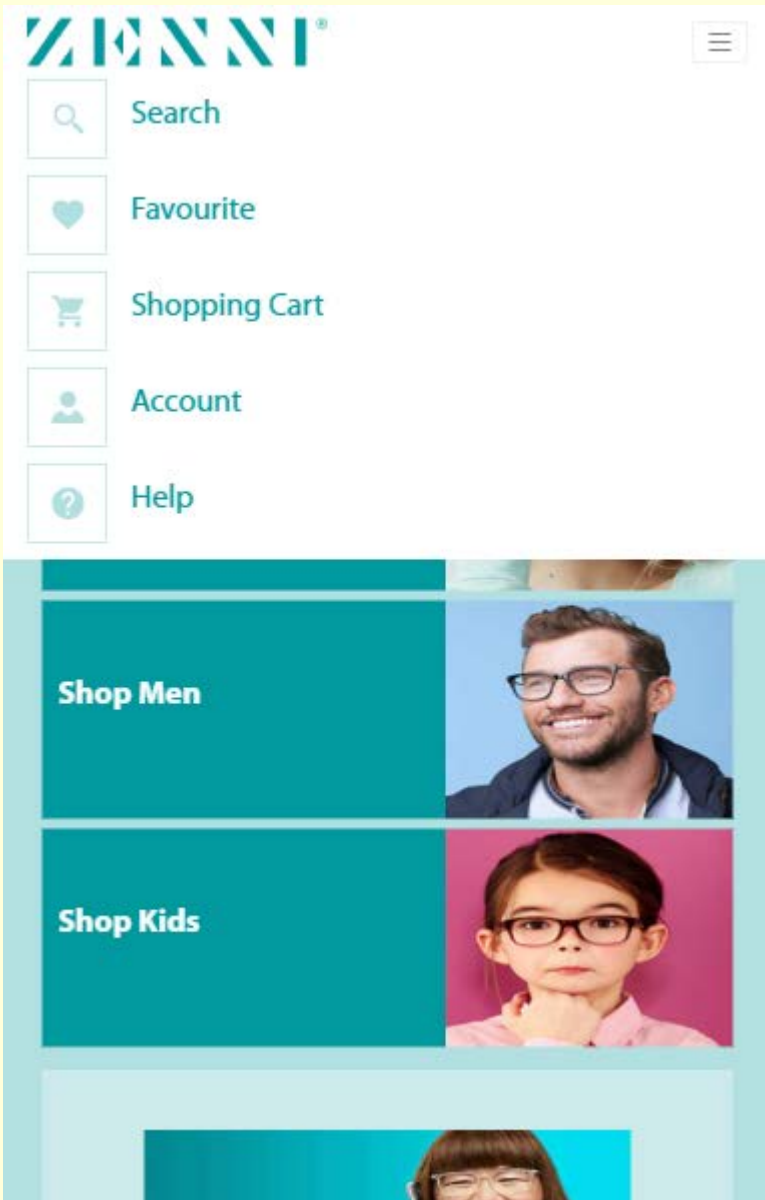

The view has now become quite small in width, so I group the items in the navigation bar into the “hamburger” button, and then re-accommodate the shop items to be in separate rows.

Remark: Most of my RWD are done using Bootstrap.

2 M「網頁寬度：768 px」

I do the same thing with the sub-topic section; that is, I separate the items horizontally to give them more space.

2 M「網頁寬度：768 px」

Also, in the “hamburger” section, I add the title for the navigation bar’s items to clarify its usage to the user, so as to achieve a better user experience.

S

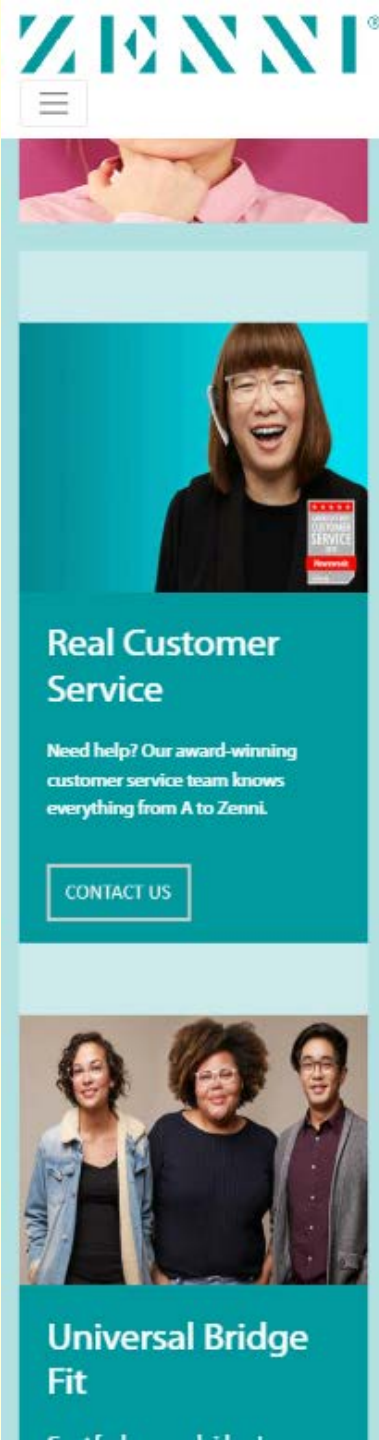

網頁寬度

320 px

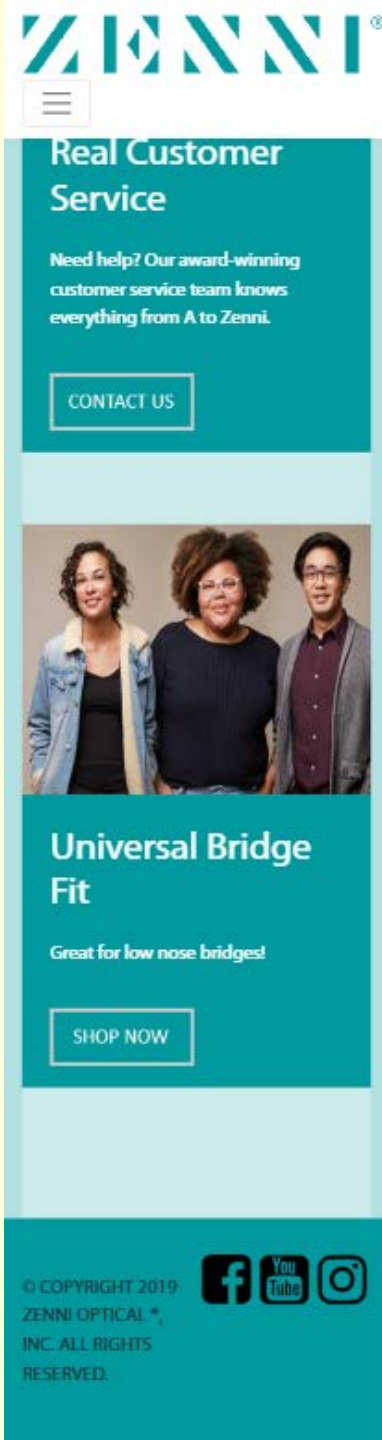

③ S「網頁寬度：320 px」

For this narrow view, I pack the “hamburger” button down because I don’t want to break down the image quality of the logo. For the same reason, the shop items’ names and pictures are also re-arranged horizontally.

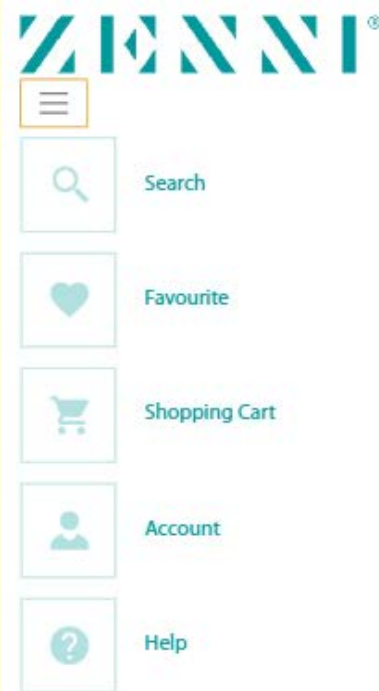

③ S「網頁寬度：320 px」

There is not much modification in terms of the topics comparing to the L-size design. I literally remove the vertical paddings of the item to enhance the use of space.

③ S「網頁寬度：320 px」

In the website's footer, I remove the margins between icons to make them distribute nice and clean in the same row.

3 S「網頁寬度：320 px」

Inside the “hamburger” button, I re-size the font of the titles to fit the view. Otherwise, “Shopping Cart” could take up to 2 lines and ruins all the elegance of the design.
